

## Airless Plastic Welder

We continue our tradition to bring to the Indian automotive industry the most innovative and profit generating tools and equipments.

We now bring to you another unique tool. We are proud to introduce to you the AIRLESS PLASTIC WELDER from USA. You will now no longer have to throw away a perfectly good bumper or headlight, simply because the tab is broken. You no longer have to throw away a full radiator assembly because of a small leakage in the plastic tank. Even your radiator overflow bottles can now be easily repaired.

Gentlemen do not worry. We are not offering you yet another hot air gun for the so-called plastic repair. We bring to you and to India for the first time a complete system of plastic repair. From bumper covers and broken head light tabs to radiators, washer bottles, fan shrouds, battery cases, dashboards, consoles etc. Everything can be repaired.

The APW is ideal for making quality repairs to virtually any type of plastic. The APW is a highly portable, variable temperature welder that is perfectly suited to the active repair shop environment. The belt clip equipped control unit is no longer tied to the storage case, which increases mobility and makes adjusting the temperature more convenient. The APW features a custom molded case for storing all the included accessories and welding rod.

It has the following benefits:

1. Ensures Speedy and Strong repairs
2. Repairs virtually any surface
3. Simple and easy to use
4. Economical way to Plastic repairs
5. No Bubbles, No Climatic Constraints Compared to bi-compound glues.
6. No Distortion of repair area as in hot air guns
