

ALUREPAIR EXAMPLE: FERRARI SIDE PANEL

The repair of the side panel and door on this Ferrari 360 spider poses a real challenge for every panel repairer. Knowing the problems of panel part replacements, the car owner absolutely wanted to avoid the common exchange of door and side panel on this convertible car. The door alone has an extremely long delivery time and costs more than Rs 1,75,000. When the owner checked the car before the paint job, he was enthusiastic and was impressed with the high quality of the repair.

ALUREPAIR EXAMPLE: Audi TT WHEEL ARCH

A damage like this cannot be repaired at all using conventional methods. After the preliminary dressing with gluing technology AluBits are being welded along the deformation with the special welding gun. Then the Strong-Puller is being used to finish the repair in a controlled way. The achievable time savings compared to part replacement amount to over sixty percent.
