

Miracle Panel Repair System

The Original Panel Repair System
Does what other tools can, plus what they can't...

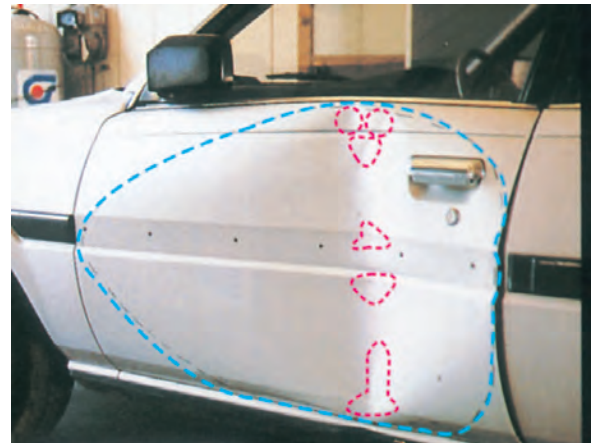

Dent Masters Corporation is proud to introduce to you the Miracle Panel Repair System from Japan. Based on the ISHIHARA method of panel repair technology, the Miracle Panel Repair System is designed to repair damaged body panels from the outside, thereby avoiding the strip and refit process normally involved in the repair of damaged body panels. Gone are the days when you had to strip and fit a panel to repair it. Gone are the days when TIME was a limitation to accepting cars for panel repair. No longer will a panel beater be reduced to doing the job of an artist, drawing lines and contours on panels filled with body filler. Give your panel beater his due, and your workshop the boost it needs. We bring to you a "Time Machine" that will change the way you repair accident-damaged vehicles forever.

Salient Features of MPRS

1. Making Panel repair easy and keeping the repair local is the secret behind the system.
2. Speeds up the repair process, saves more than 70% of time as compared to conventional system and the vehicle is returned to the customer quicker.
3. Eliminates strip and fit requirements as it works from the outside.
4. Rapid removal of dents in closed and double framed panels.
5. Keeping the repair local minimizes use of body filler, sanding etc. which makes color blending much easier.
6. Removes the most difficult of dents with unbelievable ease and in a minimum of time.
7. Tools are light and extremely easy to handle, as they are based on the principle of minimum effort and maximum results.
8. Requires minimum training to use which makes even a semi skilled operator into a skilled craftsman.
9. Keeps the vehicle original by retaining Manufacturers welds, seams and corrosion protection.
- 10.Reduces panel replacement costs, and saves cost of depreciation to customer when he is claiming Insurance.
- 11.Reduces rattle and leak problems after repairs.
- 12.No waiting for parts as job is started immediately.
- 13.Competitive high quality fast turnaround of repairs.
- 14.Cut inventory costs, as now even borderline write offs become economical repairs.
- 15.Minimize courtesy car usage.
- 16.Create more business opportunities by now attending to even routine dings and dents, especially of those time bound customers.

☐ Damaged Panel

☐ Total area of distortion

☐ The area of plastic distortion

☐ The distortion area can be reduced drastically by only repairing the plastic distortion.
