

Prep 'N' Spray Stations

Dent Masters Training Centre

The actual necessities of the automotive body shops include 5 important aspects:

1. The completion of quick jobs
2. Best quality finishes
3. Reduced cycle times due to elimination of unnecessary movement of vehicles.
4. Lowest possible energy cost.
5. Respect for the environment

Dent Masters Prep 'N' Spray Stations are economical solutions for Body Shops in need of a quick and simple prep area. They enable the user to prepare and perform sanding jobs, surface preparations and minor paint work in the same area, making them perfect for small quick touch ups. Standard models are available in single or dual bay with an efficient infra red drier to speed up the drying process for fillers, primers and paints to improve the overall quality of the finished product.

Dent Masters Prep 'N' Spray Stations form a crucial component of the refinish process. Shadow free lighting and efficient contaminant removal during the prefinish steps are essential to producing a top quality finish for body shops that demand the best.

Multiple options and configurations ensures that Dent Masters has the right Prep Station for every shop **GUARANTEED**.

Dent Masters Prep 'N' Spray Station is the ultimate in downdraft Prep Stations. Air is filtered through 3 different types of filter systems providing you with clean recirculated air. Prep "N" Spray Stations provide for fast jobs, move efficiently & with a safe environment. The system reduces hugely the preparation cycle time and energy cost. Units are available in standard dimensions as well as customised configurations. The adjoining photos are of our own training centre in Mumbai.
