Rear Arms Min & Max	863 / 1472 mm
Motor	1.5 kW

Capacity	4500 kgs
Height	4166 mm
Working Height	1805 mm
Width	3424 mm
Inside Columns	2659mm
Front Arms Min & Max	450 / 806 mm
Rear Arms Min & Max	876 /1472 mm
Motor	2.2 kW

- Asymmetric Installation allows for maximum door opening and puts the vehicle further back in the bay
- Full stroke cylinders minimizes the number of moving parts to maintain
- Dual Cylinders are equipped with throttle valve avoiding risk of hose burst
- The Double S Profile of the columns provide utmost stability at minimum space requirements
- Overhead switch bar protects the vehicle top from damage
- The supporting arms are automatically locked in position during operation
